**FUN ACTIVITY BOOK**

**UPPER**   
**ELEMENTARY**

On TV. Online. Statewide. VISIT [MichiganLearning.org](http://MichiganLearning.org)

# OUR CONTENT LIBRARY

is full of innovative lessons that bring 21st century media-driven learning to students.

The programming included in these books has video content, ready-to-use lesson plans, and fun learning materials designed by Michigan educators plus activities from PBS KIDS Shows.

## ENGLISH LANGUAGE ARTS

- Read, Write, ROAR! for all ages
- Story Pirates for Upper Elementary
- Wimee's Words for Early Learners

## MATH

- Math Might's for Early Learners and Lower Elementary
- Math Park for Upper Elementary
- Plus activities from PBS KIDS Shows like Odd Squad and Peg + Cat.

## SCIENCE

- DIY Science Time for Upper Elementary
- Live From the Opera House for Upper Elementary
- ArchiTREKS for all ages
- Plus activities from PBS KIDS Shows like Carl the Collector, Nature Cat and Elinor Wonders Why

## AND MORE!

- Get moving with InPACT at Home for all ages
- Practice art and creativity with Cartoon Academy
- Plus even more activities from your favorite PBS KIDS shows

# How to Use This Book

We've curated activities that inspire learning all summer long.

Fight the summer slide with math and writing refreshers, then explore your world with scavenger hunts and science experiments the whole family can try.

Use the guides below to make the most of this summer!

## Use Grade Levels

This book spans multiple grade levels. Choose a few lessons each week and try new ones as needed. Try tougher lessons later in the summer or next year.

## Follow Weekly Themes

This book is designed to use for 8 weeks of summer. We suggest spreading it out over a few days each week and finding a time that works for your family.

## Extend the Learning

Scan the QR codes in this book to watch videos with extra instructions and examples. Find all of our summer videos at [MichiganLearning.org/summer](https://MichiganLearning.org/summer)

**And Don't Forget!**

## Share Your Thoughts

Scan this QR code to take a short survey about our Summer of Fun program to let us know what you like about our books and what you'd like to see in the future.

Or VISIT

[MichiganLearning.org/SummerSurvey](https://MichiganLearning.org/SummerSurvey)

# Color Across Michigan!

# Weeks and Themes

Each week has a set of lessons, additional programs, activities, and field trips based on the weekly theme.

## **Week 1: Animals**

Explore the animal kingdom for ferocious fun!

## **Week 2: Across America**

From coast to coast, explore what it means to be American

## **Week 3: Sports and Games**

Get serious about fun pastimes, from soccer to Sudoku.

## **Week 4: Engineering**

Tinker, design, build, rebuild, and find engineering everywhere.

## **Week 5: Our Stories**

From legends to our everyday lives, stories shape who we are.

## **Week 6: Great Lakes**

Dive in and explore the lakes that make Michigan special.

## **Week 7: Around the World**

Experience food, art, music, and cultures from around the globe.

## **Week 8: Space**

Meet astronauts and virtually visit the planets and stars.

On TV. Online.  
Statewide.

# Learn Anywhere!

## On Air. Online. On Demand.

Serving students statewide through your local PBS station, the Michigan Learning Channel has everything kids need to build their brains and engage in learning key concepts to succeed in school!

### Preschool

Read, sing, and play with your little one.

#### Wimee's Words

*Join Wimee, the fun, lovable robot that inspires kids to learn through creativity.*

#### Simple Gift Series

*Make music, find something new, and read with Betty the Bookworm.*

#### POP Check

*Mindful practice tools to Pause, Own what we are feeling, and Practice relaxing.*

### Kindergarten to 3rd Grade

Keep kids learning with fun lessons taught by Michigan teachers.

#### Read, Write, Roar

*Kids build literacy skills with engaging ELA lessons.*

#### Math Might

*Build number sense and learn strategies for solving math problems.*

#### InPACT

*Get moving with this home-based physical activity program.*

### 4th to 6th Grade

Short, engaging videos and hands-on lessons keep tweens engaged.

#### Extra Credit

*Creative writing, math, fitness, career exploration, and more!*

#### Curious Crew

*Dr. Rob Stephensen and inquisitive kids take a hands-on approach to scientific exploration.*

#### Story Pirates

*Bite-sized literary lessons with comedians, authors, and teachers.*

VISIT us online to view all shows, learn about events,  
and download activities!

# Week 1: Animals

Explore the animal kingdom for ferocious fun! Our featured careers this week are biologist, zookeeper, and veterinarian. Scan the QR code or visit [MichiganLearning.org/Week-1-Animals](http://MichiganLearning.org/Week-1-Animals) to explore all of our videos this week.

Use the sheet below to mark off this week’s activities as you complete them. See if you can get a BINGO! Some of them are in this book, and some ask you to use your imagination or go outside.

Watch Curious About Careers	 60 mins. of activity	 Read for 20 minutes	Make a bird feeder	Watch DIY Science Time
 Read for 20 minutes	Watch Story Pirates	 Look for birds	Try “Environmental Science Issues”	 60 mins. of activity
 60 mins. of activity	Watch Math Park	 HAVE FUN! (Free Space)	Go for a walk or hike	 Read for 20 minutes
Watch Cartoon Academy	 Spot a squirrel	Go for a walk or hike	Watch InPACT at Home	Research a featured career
Watch InPACT at Home	 Read for 20 minutes	Watch Live From the Opera House	 60 mins. of activity	Write a story about an animal

# Make a Bird Feeder

## What You Need:

- Pinecone, paper towel holder or piece of bread
- Peanut butter or honey
- Your choice of the following:
  - Raisins
  - Cranberries
  - Plain popped popcorn
  - Sunflower seeds
  - Shelled plain peanuts
  - Mixed birdseed
- Safety scissors
- Wire, dental floss or cotton string

## What to Do:

- 1. Select a bird feeder base:** Pinecones are a popular foundation for a bird feeder, but you may also use an empty paper towel roll or a stale piece of bread.
- 2. String it up:** Run a wire, dental floss or cotton string through your bird feeder. Secure the two ends together to make a loop.
- 3. Make it sticky:** Coat the base with peanut butter. If you know someone who has peanut allergies, use honey instead.
- 4. Add some goodies:** Roll the feeder in raisins, cranberries, unsalted and unbuttered popcorn, sunflower seeds, shelled plain peanuts or mixed birdseed.
- 5. Hang it up:** Place your bird feeder on a hook or on a tree branch outside your window. Discover which birds are popular in your neighborhood, research what they like to eat, and make a bird feeder for them.
- 6. Keep a wildlife journal:** Record what kind of birds and other animals come to visit your feeder!

Find more games and activities at [pbskids.org/naturecat](https://pbskids.org/naturecat)

## Character Traits

Who is your character?	Choose a character trait to describe them. There are some suggestions below!
<p>SHOW the character trait to the reader! Write about what the character is DOING because of that trait.</p> <hr/> <hr/> <hr/>	

### Other words for "kind"

considerate  
generous  
helpful  
thoughtful

### Other words for "energetic"

exuberant  
lively  
spirited  
vivacious

### Other words for "friendly"

affable  
amiable  
gregarious  
welcoming

### Other words for "funny"

amusing  
comical  
hilarious  
silly

### Other words for "wise"

knowledgable  
perceptive  
prudent  
shrewd

### Other words for "unfriendly"

antisocial  
disagreeable  
hostile  
rude

### Other words for "lazy"

lackadaisical  
lethargic  
passive  
weary

### Other words for "hard-working"

diligent  
industrious  
persevering

# DIY Air Cannon

## FUN FACT

Dolphins can create vortex rings to play with in the ocean by blowing air through their blowholes. The quick burst of air combined with the round shape of the blowhole creates a vortex ring of bubbles.

## AIR PRESSURE

Air pressure, also known as atmospheric pressure, is the force exerted on a surface by the weight of air. Even though it is invisible to our eyes, the air surrounding us puts about 14.7 pounds per square inch of pressure on everything on the surface of Earth. That's a lot of pressure!

## MATERIALS

- Plastic or styrofoam cups
- Scissors
- Balloon
- Various items to knock over

## DIFFICULTY

Why do scientists love renewable energy so much?

\*Answer on the next page

**VISIT**  
**DIYSCIENTIME.ORG**  
FOR MORE SCIENCE FUN!

Copyright Alabama Public Television and Mister C, LLC 2021

## DIY Air Cannon

### EXPERIMENT

**Step 1:** Gather your materials.

**Step 2:** Cut the neck off of the balloon and keep the large part.

**Step 3:** Carefully cut a hole in the bottom of the cup about the size of a dime with your scissors.

**Step 4:** Attach the cut balloon to the mouth of the cup. Be sure to stretch it tightly and reinforce by wrapping a rubber band around the lip of the cup.

**Step 5:** Tap or gently pull back the balloon and let it go to force the air out of your cannon.

**Step 6:** Set up a target, such as hanging toilet paper, to test to see how far your air rings can reach.

### WHY IT WORKS

Although you can't see it, your cup is filled with air. When you apply a force to the air molecules by pulling back the balloon and letting it snapback, the air molecules are pushed towards the opening. This movement sets off a quick chain reaction of collisions with other air molecules and the sides of the cup. The only way for the air molecules to escape is through the opening at the bottom of the cup. The quick escape of these air molecules forms a stream of air that flows straight out of the cannon.

### EXTEND YOUR LEARNING

- What might happen if you used a different sized cup? Could you cut a 2 liter bottle to make a larger cannon?
- Could you try another stretchy material to take the place of the balloon?
- Does it change the experiment if you make the hole a different shape? What if you place it in a different spot?
- Experiment with your air cannon to see what changes allow you to shoot air the furthest.
- Have a target competition with a friend.

### WORKFORCE CONNECTION

A meteorologist studies interactions between temperature, humidity, air pressure, precipitation and vortices in the atmosphere. They develop an understanding of how vortices such as tornadoes, waterspouts and hurricanes form so they can predict the weather to keep people informed and safe. They also study and learn about the polar vortex and how it affects the weather during winter.

# Week 2: Across America

From coast to coast, explore what it means to be American. Our featured careers this week are reporter, architect, and paramedic. Scan the QR code or visit [MichiganLearning.org/Week-2-America](https://MichiganLearning.org/Week-2-America) to explore all of our videos this week.

Use the sheet below to mark off this week's activities as you complete them. See if you can get a BINGO! Some of them are in this book, and some ask you to use your imagination or go outside.

Watch Story Pirates	 60 mins. of activity	 Read for 20 minutes	Research a featured career	Guess the age of a building
 Read for 20 minutes	Research the Native Americans of Michigan	Learn about a family member's job	Watch DIY Science Time	 60 mins. of activity
 60 mins. of activity	Draw a local landmark	 HAVE FUN! (Free Space)	 Go swimming	 Read for 20 minutes
Watch Curious About Careers	 Do a good deed	Find all the states that border Michigan	Watch InPACT at Home	Name 3 states that start with the letter M
Watch InPACT at Home	 Read for 20 minutes	Go for a walk or hike	 60 mins. of activity	Spot a fire truck

# ArchiTREKS: Landmarks

**High-Rise Building**

**Monument**

**Church Steeple**

**Water Tower**

These are examples of landmarks. What landmarks are in your neighborhood? Draw a picture of a local landmark!

# WHY IS LANSING MICHIGAN'S CAPITAL?

## ACTIVITY GUIDE

### EPISODE 102: MAKING MICHIGAN

Persuasive writing is used to help win people over to your opinion. Think of something you believe in strongly, or maybe make up a funny or silly idea use the graphic organizer below to help frame your ideas to write a persuasive letter.

**Introduction:** State your opinion clearly.

**Reason 1:** Explain why you think your opinion is right.

**Reason 2:** Provide a second reason, and provide some evidence.

**Reason 3:** Explain how your opinion helps other people.

**Conclusion:** Summarize your opinion and state what you'd like your reader to do.

# SHOW **NOT TELL!** Emotion

What **emotion** would you like to "Show, Not Tell"? Pick one from the examples below, or just choose your own! If you're not sure what some of the words mean, look at the picture of the face for a clue.

Elated

Jubilant

Thankful

Gloomy

Sorrowful

Lonely

Anxious

Petrified

Startled

Frustrated

Furious

Irate

Amazed

Bewildered

Shocked

Inquisitive

Who is your character?	SHOW the emotion to the reader. What does the character SAY because they feel that way?
What <b>emotion</b> are they feeling?	

# DIY Electromagnets

## FUN FACT

The strength of magnets are measured in units of either tesla (T) or gauss (G). The tesla is used to measure very strong magnets. Weaker magnetic fields are measured in gauss. It takes 10,000 gauss to equal just 1 tesla! The strongest magnets in the world run at 45 teslas while Earth's magnetic field is only about 1/2 a gauss!

## MAGNETISM

Magnetic activities like this can be very attractive! Magnets can be found in nature and can also be created by using electricity. Electromagnets are devices that create a magnetic field through the application of electricity.

## MATERIALS

- Battery
- Wire
- Nail
- Paper clips
- Electrical tape

## DIFFICULTY

*What is a magnet's favorite sport?*

*\*Answer on the next page*

**VISIT**  
**DIYSCIENTIME.ORG**  
FOR MORE SCIENCE FUN!

Copyright Alabama Public Television and Mister C, LLC 2021

## DIY Electromagnets

### EXPERIMENT

**Step 1:** Gather your materials.

**Step 2:** Coil your wire around the nail, leaving some extra wire on both ends.

**Step 3:** Attach the wire to the battery on both ends using electrical tape.

**Step 4:** Bring the nail close to the paperclips to test your electromagnet!

### WHY IT WORKS

During this activity you are creating an electromagnet. An electromagnet uses electricity to create a magnetic field. The magnetic field is created by the electric current running through the wire, and is concentrated around the inner coil of wire where the nail is located. The nail is now a temporary magnet that can pick up small pieces of metal.

### EXTEND YOUR LEARNING

- How could you make your electromagnet pick up more paper clips? Or bigger paper clips?
- Could you stack two batteries together?
- What would happen if you changed the type or size of nail you are using?
- Do different types of nails work?

### WORKFORCE CONNECTION

A radiologist is a doctor who performs and reads medical imaging such as ultrasounds, X-rays and MRIs to check for problems and diseases. MRIs (Magnetic Resonance imaging) are devices that take pictures of the inside of the body using electromagnets.

# Week 3: Sports and Games

Get serious about fun pastimes from soccer to Sudoku. Our featured careers this week are dancer, athletic trainer, and musician. Scan the QR code or visit [MichiganLearning.org/Week-3-Sports](https://MichiganLearning.org/Week-3-Sports) to explore all of our videos this week.

Use the sheet below to mark off this week's activities as you complete them. See if you can get a BINGO! Some of them are in this book, and some ask you to use your imagination or go outside.

Try an InPACT Activity Card	 60 mins. of activity	 Read for 20 minutes	Watch Math Park	Watch Curious About Careers

Practice portioning with Cyberchase	Watch Story Pirates	Try an InPACT Activity Card	Learn about a famous athlete	Watch Live From the Opera House
Watch InPACT at Home	 Read for 20 minutes	Make an obstacle course	 60 mins. of activity	Try a new food

Week of \_\_\_\_\_

Jackie loves to be active. To help maintain good health and give her enough energy, she needs the following amounts from each food group each day:

**Fruits**  
**1 ½ Cups**

**Grains**  
**5 ounces**

**Protein**  
**5 ounces**

**Dairy**  
**3 cups**

**Vegetables**  
**2 Cups**

On the chart below, circle foods and drinks that will give Jackie the total amounts from each food group that she needs for one day. Add your choices up and total carefully to be sure. Note: "oz." is the abbreviation for ounce.

Vegetables	Fruits	Grains	Protein	Dairy
Small bowl of romaine lettuce (1/2 cup)	Small orange (1/2 cup)	2 slices whole-wheat bread (2 oz whole grains)	Slice of turkey (1 oz)	Glass fat-free milk (1 cup)
Small bowl spinach (1/2 cup)	Small apple (1/2 cup)	5 whole-wheat crackers (1 oz whole grains)	1 hard-boiled egg (1 oz)	2 slices low-fat Swiss cheese (1 cup)
Medium baked potato (1 up)	Large banana (1 cup)	1/2 cup cooked brown rice (1 oz whole grains)	1/2 cup cooked black beans (2 oz)	1.5 oz low-fat shredded cheddar cheese (1 cup)
12 baby carrots (1 cup)	16 grapes (1/2 cup)	Packet of instant oatmeal (1 oz whole grains)	Small hamburger patty (3 oz)	Snack-size container low-fat yogurt (1/2 cup)
Large sweet potato (1 cup)	Mango (1 cup)	3 cups popped popcorn (1 oz whole grains)	Small chicken breast half (3 oz)	1 fat-free milk chug (1 cup)
6-8 cherry tomatoes (1 cup)	large peach (1 cup)	Medium piece of cornbread (2 oz refined grains)	12 almonds (1 oz)	Slice low-fat American cheese (1/2 cup)
Large ear of corn (1 cup)	large plum (1/2 cup)	Small whole-wheat tortilla (1 oz whole grains)	Small salmon patty (3 oz)	Small low-fat milk carton (1 cup)
<b>TOTAL CUPS:</b>	<b>TOTAL CUPS:</b>	<b>TOTAL OUNCES:</b>	<b>TOTAL OUNCES:</b>	<b>TOTAL CUPS:</b>

# CREATE YOUR HERO

Time  
to Draw!

Draw and label your hero!

Hero's name

# IMPACT at HOME

## Activity Cards

Cut out the cards. When you're feeling antsy, try following the directions for one of the exercises!

## Blast-Off Lunges

### INSTRUCTIONS

1. Get into a lunge position with left leg forward, hips underneath you, and right leg behind your right hip.
2. Slowly sink into a lunge, trying to get your knee to touch the ground.
3. Immediately "blast off" by hopping upwards and into next lunge position with right leg forward and left leg behind.
4. If needed, instead of jumping into the next lunge position, jump with feet together and then bounce into lunge position.
5. Repeat as many rounds as possible.

IMPACT at HOME © 2021 Regents of the University of Michigan

## Side Leg Lifts

### INSTRUCTIONS

1. Start by laying on your side with your legs stacked on top of each other.
2. Slowly raise your top leg up towards the sky and then back down.
3. Complete 10 repetitions and then switch legs.
4. Complete 3 sets per leg.
5. For added challenge, tape a bag of water to the top leg for some added weight!

IMPACT at HOME © 2021 Regents of the University of Michigan

## Tap Backs

### INSTRUCTIONS

1. Stand up tall and proud with your feet together and hands on your hips.
2. Take your right foot and tap it right behind you, then place back to starting position.
3. Take your left foot and tap it right behind you, then place back to starting position.
4. Repeat as fast as can to get 100 tapbacks (50 on each leg).

IMPACT at HOME © 2021 Regents of the University of Michigan

## Ski Jumps

### INSTRUCTIONS

1. Start by standing tall with your feet shoulder width apart.
  2. Using only your right foot, jump to the left about 2-3 feet and land on your left foot.
  3. Gather yourself and then using only your left foot, jump to the right 2-3 feet and land on your right foot.
  4. Repeat this as many times as you can for 30 seconds.
- Bonus: After each time you jump, touch the ground with the same hand as the side you landed on.  
Ex: Land on your left foot, touch the ground with your left hand.

IMPACT at HOME © 2021 Regents of the University of Michigan

## Cereal Bowl

### INSTRUCTIONS

1. Lay flat on your back with feet together.
2. Bring your knees together and raise both legs up so that your feet are facing the ceiling.
3. In slow motion, stir the imaginary bowl of cereal with feet and keep hands under your bottom.
4. Repeat 30 times.

IMPACT at HOME © 2021 Regents of the University of Michigan

## Lay Down Hip Stretch

### INSTRUCTIONS

1. Start by sitting at the edge of a bed in a relaxed position with your feet hanging off.
2. Lay back, and pull your right knee towards your chest while keeping your left leg hanging off the bed.
3. Pull your knee until you feel a stretch in your left hip and hold for 10-15 seconds.
4. Relax, switch legs, and then repeat 2-3 times per leg.

IMPACT at HOME © 2021 Regents of the University of Michigan

## Aligator Breath

### INSTRUCTIONS

1. Stand with legs hip-width apart
2. Spread arms out wide and inhale as you reach outward.
3. When you exhale, clap your hands together as many times as possible like baby alligator jaws.

IMPACT at HOME © 2021 Regents of the University of Michigan

## Cloud Watching

### INSTRUCTIONS

1. Find a day where there are a lot of clouds in the sky.
2. Lay down on your back on the ground or in the grass and look up into the sky.
3. Watch and admire all the different clouds. Look at the different shapes they make, how fast/slow they're moving, and where they are moving to!

# MATH PARK

## Fractions of a Set

Directions: Scan the QR code to watch the video, and then write the fraction you see in the picture.

# DIY Snake Bubbles

## FUN FACT

Some fish use bubbles as a nest for their baby fish eggs. These fish blow lots of tiny bubbles that float to the top of the water, creating a "hidden" spot for the baby fish eggs to hide from predators until they can hatch.

## MATERIALS

- Bowl
- Water
- Dish soap
- Scissors
- Plastic water bottle
- Craft stick
- Sock

## DIFFICULTY

## SURFACE TENSION

Surface tension allows liquids to be strong. The strength is from cohesion, where a liquid's molecules are attracted to each other. Water is made of many tiny H<sub>2</sub>O molecules that are attracted to each other especially at the surface. Soaps and detergents decrease surface tension, breaking down dirt and grime. This decrease in surface tension allows bubbles to be made.

## VISIT

[DIYSCIENTIME.ORG](http://DIYSCIENTIME.ORG)  
FOR MORE SCIENCE FUN!

*What is a bubble's favorite sport?*

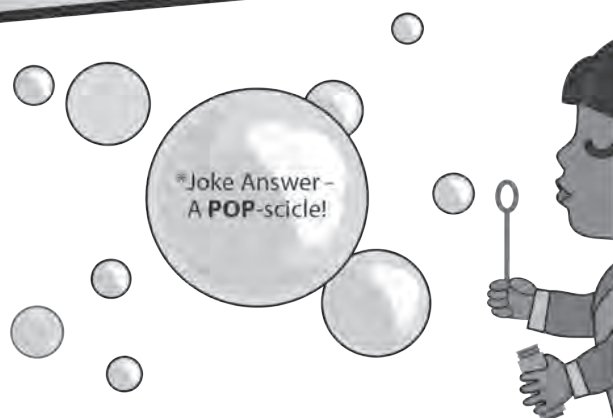

\*Answer on the next page

Copyright Alabama Public Television and Mister C, LLC 2021

## DIY Snake Bubbles

### EXPERIMENT

- Step 1:** Gather your materials.
- Step 2:** Pour 2 cups of water into the bowl.
- Step 3:** Add 1/4 cup dish soap to 2 cups of water, and stir with a craft stick.
- Step 4:** Use scissors to carefully cut off the bottom of the water bottle.
- Step 5:** Put a sock over the bigger end of the bottle.
- Step 6:** Dip the sock into the soapy solution.
- Step 7:** Blow air into the smaller end of the bottle.

### Bubble Diagram

### WHY IT WORKS

Water mixed with soap decreases the water's surface tension and allows the water to become "flexible". A soap bubble filled with air is made of three very thin layers: soap, water, and another layer of soap. This sandwiches the water, allowing a bubble to form. As you blow the soapy water mixture through the holes in the sock material, tiny bubbles are formed very close together making the shape of a snake.

### EXTEND YOUR LEARNING

- Do the bubbles look different if you use socks made of different materials? Try a dress sock or tights?
- What other bubble makers or bubble wands can you design?
- What happens if you change the amount of soap or water in your bubble solution?
- What might happen to the strength of your bubble if you were to add glycerin or corn syrup?

### WORKFORCE CONNECTION

Chemists work with soaps and detergents to make the best cleaner. They need to understand the chemistry of the soap molecules and how they reduce the surface tension of water as well as grabbing onto the oils and dirt.

# Week 4: Engineering

Tinker, design, build, rebuild, and find engineering everywhere. Our featured careers this week are engineers from all kinds of specializations, auto design director, and software developer. Scan the QR code or visit [MichiganLearning.org/Week-4-Engineering](http://MichiganLearning.org/Week-4-Engineering) to explore all of our videos this week.

Use the sheet below to mark off this week's activities as you complete them. See if you can get a BINGO! Some of them are in this book, and some ask you to use your imagination or go outside.

Watch DIY Science Time	 60 mins. of activity	 Read for 20 minutes	Watch ArchiTREKS	Try the Daring Design Challenge

# DECODING WORDS: TRANSPORTATION

## ACTIVITY GUIDE

SCAN TO WATCH LESSON

### EPISODE 105: GETTING FROM HERE TO THERE

Let's read about the Ambassador Bridge! Circle any words with the root word **-port-**. Remember, **-port-** means "to carry or bring." Then, use the key to discuss what those words mean!

#### The Ambassador Bridge

You may have heard of the Mackinac Bridge in Michigan, but do you know about the Ambassador Bridge? The Ambassador Bridge is an important bridge in Michigan that connects Detroit, Michigan, and Windsor, Ontario, in Canada! Many companies transport their goods across the bridge on large trucks.

Imports and exports sent over the bridge help people in both countries.

#### PREFIXES

ex-

out or away

im-

in or into

trans-

across or beyond

#### SUFFIXES

-ant

doing the action of the verb

-s

more than one

Write a sentence about the Ambassador Bridge! Include two **-port-** words.

---

---

# DESCRIBE YOUR HERO

What are some words to describe your hero?

What is your hero really **GOOD** at, or what is your hero's **TALENT**?

What is your hero's **WEAKNESS**, or what is your hero **AFRAID** of?

What does your hero like to do on a **NORMAL DAY**, when they don't have a big problem to solve?

# MATH PARK

## Equivalent Fractions

Directions: Scan the QR code to watch the video, and then circle the symbol that goes between them.

$$\frac{3}{10} > \frac{3}{5}$$
$$\frac{3}{10} < \frac{3}{5}$$

$$\frac{1}{4} > \frac{1}{8}$$
$$\frac{1}{4} < \frac{1}{8}$$

$$\frac{5}{5} > \frac{5}{15}$$
$$\frac{5}{5} < \frac{5}{15}$$

$$\frac{1}{2} > \frac{1}{4}$$
$$\frac{1}{2} < \frac{1}{4}$$

# Daring Design Challenge

**Work together to build something new.**

Sally and Nick build a bridge that's long and strong, a boat that floats, and a vase with a cool base. What can YOU create? Work together with a friend and challenge your building brains by designing some amazing creations in this collaborative game.

## Materials

- Daring Design Challenge cards (print two-sided)
- The Engineering Design Process wheel
- Paper
- Pencil
- Tape
- Various household items  
(Examples: wooden craft sticks, paper, straws, building blocks, fabric scraps, cans, aluminum foil, paper plates and cups, string, etc.)

## Play the Game

1. Print and cut out the Daring Design Challenge cards and the Engineering Design Process wheel.
2. Together, select a game card from the pile.
3. Follow the challenge and make something amazing as you move step by step—along with THE CAT IN THE HAT—through the Design Process wheel.

## Tip

The shape and weight of a design can affect how it works. You may need a wider base or different material for your designs to balance, float, or move.

## Remember

Accidents happen — if you're lucky! It's okay if things don't always happen how we planned. Sometimes we discover something unexpected that makes our designs even better.

## More Ways to Play

1. Think of a problem that needs to be solved. Using the four blank Daring Design Challenge cards (included in this printout), create four more design challenges. Try them with a friend.
2. Choose a design you already created and make it again using a different material.
3. Time how long it takes you to build a design. Then try it again. Can you beat your time?

# The Engineering Design Process

THE CAT IN THE HAT

Stabilizer

1. With an adult's help, cut out THE CAT IN THE HAT figure, the stabilizer, and the wheel. Then cut along the vertical lines at the base of THE CAT IN THE HAT and the top of the stabilizer.
2. Push the stabilizer into the base of THE CAT IN THE HAT to create a "+". THE CAT IN THE HAT should now stand.
3. Use THE CAT IN THE HAT to guide you around the wheel.

Funded by a Ready to Learn Grant

This page was left blank to cut out the activity on the other side.

**Create a musical instrument that can make three different notes or sounds.**

**Imagine & Plan!**

Sounds can come from hitting or plucking an object, or blowing on or through objects of different lengths. What objects can help your design work?

**Make a boat that floats.**

**Test!**

Fill the bathtub or a sink with water to test your boat. Hope it floats!

**Design something taller than you.**

**Create!**

Have fun building together. Accidents happen, if you're lucky! Use a mistake to make it even better.

**Build something that will balance a pencil.**

**Improve!**

Can it balance two pencils? Three?

**Design something that can launch a coin into the air.**

**Test!**

How do you know if it is balanced?

**Create something beautiful—just because.**

**Imagine & Plan!**

Ask a friend how your creation makes him or her feel.

**Make a ball that bounces.**

**Improve!**

Can you make something that helps you move it faster?

**Build a tower as tall as your table using only paper.**

**Imagine & Plan!**

What can you do to make paper stronger and taller?

This page was left blank to cut out the activity on the other side.

# DIY Elephant Toothpaste

## FUN FACT

Seaweed is in our toothpaste! Seaweed acts as a thickening agent that allows toothpaste to be squeezed from its tube!

## MATERIALS

- Yeast
- Dish soap
- Measuring spoons
- Empty plastic bottle
- Cup with warm water
- 3% Hydrogen peroxide

## DIFFICULTY

## CHEMICAL REACTIONS

Chemical reactions take place when the molecular or ionic structure of a substance is rearranged. When a chemical reaction occurs, a new substance is created and the process is irreversible. Today we will be making elephant toothpaste!

**VISIT**  
**DIYSCIENTIME.ORG**  
FOR MORE SCIENCE FUN!

**Why are chemists great at solving problems?**

\*Answer on the next page

Copyright Alabama Public Television and Mister C, LLC 2021

## DIY Elephant Toothpaste

### EXPERIMENT

**Step 1:** Gather materials.

**Step 2:** Place 2 tablespoons of yeast into 3 oz of warm water.

**Step 3:** Mix yeast and warm water, let stand until it gets frothy (about 3 minutes).

**Step 4:** Pour 4 ounces of hydrogen peroxide into an empty bottle.

**Step 5:** Squirt 1 tablespoon of dish soap into the hydrogen peroxide.

**Step 6:** Pour your yeast mixture into the bottle.

**Step 7:** Observe what happens!

### WHY IT WORKS

"Elephant toothpaste" is created when a chemical reaction takes place and releases one oxygen atom from the hydrogen peroxide ( $H_2O_2$ ). Hydrogen peroxide decomposes, or breaks down, into water ( $H_2O$ ) and oxygen ( $O_2$ ) naturally over time, but the yeast causes this to occur faster. The yeast has an enzyme in it called catalase. Catalase is a catalyst, something that increases the speed of the reaction. The catalyst is what causes the oxygen to be released quickly to create our "elephant toothpaste." So why did we add soap? We wanted to capture all of the released oxygen (gas) from the chemical reaction!

### EXTEND YOUR LEARNING

- Would the experiment still work if you added more yeast?
- What happens if you don't add the soap?
- Does the shape or the size of the bottle change how the elephant toothpaste flows?

### WORKFORCE CONNECTION

Cosmetologists, people who study the application of beauty treatments, work carefully with chemical reactions on a daily basis to help color people's hair. When someone's hair is bleached, a chemical reaction takes place to change the melanin from brown to a colorless (pale yellow) color. This irreversible process (chemical change) then allows the cosmetologist to apply a new color to the hair.

# Week 5: Our Stories

From legends to our everyday lives, stories shape who we are. Our featured careers this week are writer, archaeologist, and teacher. Scan the QR code or visit [MichiganLearning.org/Week-5-Stories](https://MichiganLearning.org/Week-5-Stories) to explore all of our videos this week.

Use the sheet below to mark off this week's activities as you complete them. See if you can get a BINGO! Some of them are in this book, and some ask you to use your imagination or go outside.

Learn about a family member's job	 60 mins. of activity	 Read for 20 minutes	Read a story from a different country	Try "Going on a Book-nic"

Directions: Scan the QR code to watch the video, and then add and subtract the fractions.

$$\frac{4}{8} + \frac{1}{8} = \underline{\hspace{2cm}}$$

$$\frac{2}{4} + \frac{1}{4} = \underline{\hspace{2cm}}$$

# THE HERO SIZED PROBLEM

Every story involves some sort of problem, but in a hero story that problem is SO HUGE that a whole community is in danger, and a hero needs to save the day! For more ideas on how to create a Hero Sized Problem, check out our Hero Stories videos at [storypirates.com/storypiratesuniversity](http://storypirates.com/storypiratesuniversity).

What is the **COMMUNITY** where your story takes place? A city? A town? An underground snow fortress? Use your imagination, then draw and label a picture or map!

What is the **HERO SIZED PROBLEM** in the community?

# CREATIVE SOLUTIONS

The Hero Sized Problems of today can't be solved just by punching, kicking, and blowing things up. Heroes need to be able to use their imaginations, and come up with creative ways to solve problems that nobody has ever thought of before. For more ideas on how to invent some **CREATIVE SOLUTIONS**, and then have your hero **TRY, FAIL, AND TRY AGAIN**, check out our Hero Stories videos at [storypirates.com/storypiratesuniversity](http://storypirates.com/storypiratesuniversity).

The **FIRST** solution the hero tried:

Unfortunately (what went wrong?):

The **NEXT** thing the hero tried:

Unfortunately (what went wrong?):

The solution that **FINALLY** worked:

It worked because:

# DIY Heatless Lava Lamp

## FUN FACT

Lava lamps were invented in 1948 and were originally called "Astro Lamps." The lava lamp made its television debut in the US in the 1960s on a show called "Doctor Who." Sales skyrocketed after this TV appearance!

## MATERIALS

- 2-liter bottle
- Vegetable oil
- Water
- Effervescent tablets
- Food coloring
- Funnel

## DIFFICULTY

## DENSITY

Density is a measurement of the matter an object has within a given volume. Objects with more matter in a given volume have a higher density. Objects with less matter in the same amount of volume have a lower density. Density is found by dividing the mass of an object by its volume.

## VISIT

[DIYSCIENTIME.ORG](http://DIYSCIENTIME.ORG)

## DIY Heatless Lava Lamp

### EXPERIMENT

- Step 1:** Gather your materials.
- Step 2:** Clean and rinse your empty 2-liter bottle.
- Step 3:** Pour 3 cups of water into your bottle.
- Step 4:** Add food coloring to the water.
- Step 5:** Gently pour vegetable oil into the bottle and observe how the water and oil interact.
- Step 6:** After allowing the water and oil to settle, drop pieces of the effervescent tablets into the bottle.
- Step 7:** Observe what happens!

\*Joke Answer -  
The water from your faucet!

### WHY IT WORKS

The oil and water stay separate because they have different densities. The oil floats on the water because it's less dense than water. When the effervescent tablet sinks to the bottom, it mixes with the water and starts a chemical reaction that produces carbon dioxide, a gas that rises through the oil. When these bubbles rise, they pull some of the colored water up and through the oil. The gas eventually escapes at the top, but the water falls back down through the oil because it is more dense!

### EXTEND YOUR LEARNING

- What happens if you add more pieces of effervescent tablet, or change the amount of water in the bottle?
- Try shining a light, like a flashlight, through the bottle. What can you see differently?
- Is there a limit to the number of times you can repeat the experiment?

### WORKFORCE CONNECTION

Paint chemists are scientists who study the properties and use of paint. Most paints are made of the same basic ingredients: pigments, binders, liquids, and additives. How these ingredients interact due to their densities plays an important part in determining the way that paint performs. Paint chemists study things like how well a paint can cover a surface or how long a paint may be able to last outside in the weather.

# Week 6: Great Lakes

Dive in and explore the lakes that make Michigan special. Our featured careers this week are meteorologist, oceanographer, and water chemist. Scan the QR code or visit [MichiganLearning.org/Week-6-Lakes](https://MichiganLearning.org/Week-6-Lakes) to explore all of our videos this week.

Use the sheet below to mark off this week's activities as you complete them. See if you can get a BINGO! Some of them are in this book, and some ask you to use your imagination or go outside.

 Go fishing	 60 mins. of activity	 Read for 20 minutes	 Watch the sunset	Make a pond viewer
 Read for 20 minutes	Watch Story Pirates	Name all 5 Great Lakes	Design a boat or ship	 60 mins. of activity

# A POND WITH A VIEW

## DIFFICULTY: EASY

While there is action all around a pond, what do you think is happening *in* the water? Ponds are filled with animal and plant life that have special qualities that help them spend all or most of their lives underwater. Make this pond viewer to bring on your next pond exploration!

## MATERIALS

- One-half gallon milk carton
- Scissors
- Waterproof, strong tape (e.g. duct tape) or a sturdy rubber band
- Heavy, clear plastic wrap

## LET'S MAKE A POND VIEWER!

- 1 Have an adult cut off the very top of the milk carton and the very bottom to create a rectangular tube.
- 2 Tear off a sheet of plastic wrap and place it over one of the open ends. Fold down the plastic wrap... make sure wrap is smooth and tight for clear viewing.
- 3 Using the tape or the rubber band, secure the plastic wrap in place. Keep the plastic wrap as tight as possible so you have a flat viewing surface.

[pbskids.org/naturecat](http://pbskids.org/naturecat)

The PBS KIDS logo is a registered mark of PBS and is used with permission. © 2015 Spiffy Pictures. All rights reserved.

## POND VIEWING TIPS

- 1 Splashing and stirring up mud will make it difficult to see into the pond. Be as still as possible when using your viewer.
- 2 Despite what NatureCat says, it is noble and fun to get wet! If the shoreline is murky, slowly wade out to your knees before using your viewer where it may be less murky.
- 3 Other ways to view: on a dock, over the side of a canoe, or in a stream, lake or tide pool!

## LET'S TAKE A CLOSER LOOK

Describe a plant or animal that you see. Draw a picture of it, and ask an adult to help you identify and label your picture.

[pbskids.org/naturecat](http://pbskids.org/naturecat)

<b>BEGINNING</b>	<b>MIDDLE</b>	<b>ENDING</b>

# DIY Bouncy Ball Recipe

## FUN FACT

Bini the Bunny holds the world record for the most basketball slam dunks in one minute by a rabbit. Bini made 7 dunks in just 60 seconds! Now that's one bouncy bunny!

## MATERIALS

### Ball mixture

- Glue
- Cornstarch
- Food coloring
- Mixing bowl
- Measuring spoons

### Borax Bath

- Borax
- Warm water
- Mixing bowl

## DIFFICULTY

**Why did the bucket bounce?**

\*Answer on the next page

## POLYMERS

Polymers are large molecules made from bonded (chemically linked) groups of similar atoms. The word polymer is Greek for "many parts." Polymers are made of many monomers (Greek for "one part"). A polymer is a chain of linked monomers. Polymers can be found all around us: bicycle tires, plastic plates, strands of our hair, and even super duper bouncy balls!

**VISIT**  
**DIYSCIENCE.ORG**  
FOR MORE SCIENCE FUN!

Copyright Alabama Public Television and Mister C, LLC 2021

## DIY Bouncy Ball Recipe

### EXPERIMENT

**Step 1:** Create a Borax bath by mixing together 2 Tbsp Borax into 1 cup of warm water in a mixing bowl.

**Step 2:** Create your ball mixture by mixing together 1 Tbsp cornstarch with 2 Tbsp of glue. If you want your ball to be colored, add food coloring and mix together in another bowl.

**Step 3:** Carefully drizzle your ball mixture into your Borax bath. Allow it to sit in the bath for 15-20 seconds. Stir and make sure that all parts of the mixture have been activated by the Borax bath (should feel firm).

**Step 4:** Remove your ball mixture from the Borax bath and form into a ball shape. A measuring spoon can be used as a guide to help shape your ball. Place your ball back into the Borax bath for 60 seconds.

**Step 5:** Be sure to wash your hands after handling the Borax bath.

**Step 6:** Try bouncing and testing your ball!

### WHY IT WORKS

You are seeing a chemical reaction right before your eyes during this experiment. The glue is a polymer and the Borax links together the molecule chains of the glue. The cornstarch helps to thicken the mixture, allowing it to be formed and hold a ball-like shape. Although you can't see the molecules linking in the chemical reaction, we know a chemical reaction has taken place because our ingredients have combined to create a new item!

### EXTEND YOUR LEARNING

- What happens if you changed the amount of cornstarch or glue used in the recipe? Could you make a larger ball?
- Does your bouncy ball behave differently if chilled in the freezer?
- Could you separate your recipe and use different food coloring to make a multi-colored ball?

### WORKFORCE CONNECTION

A geneticist is a biologist who studies genetics, the science of genes, heredity, and variation of organisms. The genes they study are made of polymers called DNA. Two long strands of these polymers form the familiar double helix shape of DNA. The monomers that make up DNA strands are called nucleotides. Geneticists study the genes of organisms like human beings, animals, crops and bacteria.

# Week 7: Around the World

Experience food, art, music, and cultures from around the globe. Our featured careers this week are chef, airplane pilot, and cybersecurity expert. Scan the QR code or visit [MichiganLearning.org/Week-7-World](https://MichiganLearning.org/Week-7-World) to explore all of our videos this week.

Use the sheet below to mark off this week's activities as you complete them. See if you can get a BINGO! Some of them are in this book, and some ask you to use your imagination or go outside.

Make paper airplanes with Ready Jet Go	 60 mins. of activity	 Read for 20 minutes	Write a story about traveling	Learn to say hello in another language
 Read for 20 minutes	Write your hero story with Story Pirates	Design your own flag	Learn about a family member's job	 60 mins. of activity

Watch Live From the Opera House	Learn about a place you'd like to visit	Watch Cartoon Academy	Watch InPACT at Home	Watch Virtual Vitamin Z
Watch InPACT at Home	 Read for 20 minutes	Make Density Art	 60 mins. of activity	Create a musical instrument

# Paper Airplane

1. Fold paper in half the long way and reopen.

2. Fold the top two corners into the center spine of the paper.

3. Refold lengthwise and rotate the paper to lay on the table like this:

4. Fold the top left corner down to lay parallel to the bottom spine. Repeat this step on the other side.

5. Turn the paper over and repeat the last two steps. Your airplane should look like this!

6. Now, try to fly it to the moon! How far can you make the airplane fly?

# Density Art

1. Scan the QR code on this sheet to watch the video and follow along with Mister C.

helps you

2. You'll need:

- a. This printout
- b. Plain printer paper or canvas paper
- c. Food coloring
- d. Vegetable Oil
- e. Pipette or straw
- f. Pan

## Discussion Questions:

Does the type of paper impact the art?

How can you manipulate the colors to make more colors than you originally had in the food coloring box?

What if you added something like glitter to the oil and water mixture?

## Fun Fact:

Symmetry is used in photography to create beautiful images. Butterflies have a line of symmetry down the center of their bodies.

# URBAN SPRAWL HAIKU

# ACTIVITY GUIDE

## EPISODE 112: WILDLIFE HABITS

Mr. Kass explained the concept of urban sprawl and explained how Haiku, a form of Japanese poetry, often explores the intersection between the natural world and the human-built one. He then talked us through how to write a Haiku that attempts to explore that intersection.

1. Read Mr. Kass' examples of Haiku.
2. Think about areas you've experienced where it seems like the natural world is intersecting with the human built one.
3. Write your own Haiku where you explore that intersection. Try to write at least 4-5 Haiku.

### Mr. Kass' Haiku

#1

On the lake bottom  
a walleye peeks into  
the nose of a soda bottle

#2

Mist rises above a stand  
of Michigan pines  
and a cell phone tower

#3

In the dumpster  
behind a restaurant's kitchen  
the glint of a raccoon's eye

# MATH PARK

## Introducing Decimals: Tenths

Directions: Scan the QR code to watch the video, and then write each fraction as a decimal.

$$\frac{1}{10} = 0.1$$

$$\frac{3}{10} =$$

$$\frac{8}{10} =$$

$$\frac{2}{10} =$$

$$\frac{5}{10} =$$

$$\frac{9}{10} =$$

$$\frac{10}{10} =$$

$$\frac{7}{10} =$$

$$\frac{6}{10} =$$

$$\frac{4}{10} =$$

\*Joke Answer -  
They have lots of degrees!

## DIY Thermometer

### EXPERIMENT

**Step 1:** Gather materials.

**Step 2:** Fill your bottle about half way up with water and add a few drops of food coloring.

**Step 3:** Shape the modeling clay into a sphere larger than the opening of the bottle. Carefully poke your straw through the clay (make sure the straw doesn't get blocked).

**Step 4:** Place the clay sphere and straw on top of the bottle, allowing the straw to reach near the bottom of the bottle (don't allow the straw to touch the bottom of the container). Seal the bottle with the clay, making sure there are no gaps to allow air to enter.

**Step 5:** Note the level of the water, this is room temperature.

**Step 6:** Try placing your thermometer in ice water and observe what happens to the liquid in the straw.

### WHY IT WORKS

When the temperature of the liquid in the bottle increases, it has gained energy, causing its molecules to expand and rise into the narrow straw. When the liquid cools, its molecules lose energy causing them to contract, allowing the liquid in the tube to fall to a lower level. Therefore, high levels of liquid in the tube indicate a higher temperature and low levels indicate a lower temperature.

### EXTEND YOUR LEARNING

- What happens if you put your thermometer into warm water?
- Would using a liquid other than water change the way your thermometer behaves?
- Could you add lines to your thermometer to get a better, more accurate reading?

### WORKFORCE CONNECTION

Solar photovoltaic (PV) installers, also known as PV installers, assemble, set up, and maintain rooftops or other systems that convert sunlight into energy. Solar photovoltaic installers usually work as part of a team. They must understand how solar energy is converted into electric energy by the solar panels they install. They must also set up systems to safely store this collected solar energy for use in homes and businesses.

# Week 8: Space

Meet astronauts and virtually visit the planets and stars. Our featured careers this week are astronaut, astronomer, and computer scientist. Scan the QR code or visit [MichiganLearning.org/Week-8-Space](https://MichiganLearning.org/Week-8-Space) to explore all of our videos this week.

Use the sheet below to mark off this week's activities as you complete them. See if you can get a BINGO! Some of them are in this book, and some ask you to use your imagination or go outside.

 Stargaze	 60 mins. of activity	 Read for 20 minutes	Draw a space creature	Watch Career Girls
 Read for 20 minutes	Try the Odd Squad Robot Coder	Create your own constellation	Research a featured career	 60 mins. of activity
 60 mins. of activity	Draw your hero story with Story Pirates	 <b>HAVE FUN!</b> (Free Space)	Look at the clouds	 Read for 20 minutes
Name all the planets in the solar system	Watch NASA at Home	Watch Live From the Opera House	Watch InPACT at Home	Visit a new place
Watch InPACT at Home	 Read for 20 minutes	Design a rocket ship	 60 mins. of activity	 Stargaze

# Robot Coder

Name \_\_\_\_\_

**Follow the code!** Agent Oswald needs YOUR help to move the ODD-some robot through the warehouse to retrieve his gadgets. Use the key on the side of the page and follow the codes to guide the robot.

		<b>Start</b> 		

**Key**

- Forward
- Left
- Right
- 3** Number of Spaces

**Code 1** **2** **2** **Where did you end?** \_\_\_\_\_

**Code 2** **1** **3** **Where did you end?** \_\_\_\_\_

Code 1 = Z on the grid. Code 2 = X on the grid.

# Robot Coder

Name \_\_\_\_\_

**Write your own code!** Mark a box on the grid as the start. Select a shape (●◆▲●) as the ending point. On a separate piece of paper write the name of this shape. This is the answer to Code 1.

Fill in the blank spaces below for Code 1. You don't have to fill in all the boxes, but you can. Use arrows (e.g., ↑ ↓ ← →) and numbers to create your code. Remember, the robot must move around objects.

To create Code 2, do the same thing only choose a different shape for the ending point. Write the name of this shape on a separate piece of paper. Fill in the blank spaces below for Code 2.

Challenge a family member or friend to follow your codes and tell you where they ended. You can then reveal your answers!

**Code 1**

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

## EPISODE 104 - MICHIGAN'S TASTY TREATS

We used the famous (and delicious!) Michigan pasty to help us learn a bit of history and see a model of how to write descriptively about a favorite food.

Complete the chart below with sensory words to describe *your* favorite meal. What do you see, taste, hear, smell, and touch while eating it? Then, write a few descriptive sentences about your favorite meal including sensory details from the chart to make your writing coming alive!

See

Taste

Hear

Smell

Touch

My Favorite Meal

# DRAW YOUR STORY!

Use the story you wrote earlier in this book to draw a comic!

# DRAW YOUR STORY!

# DIY Thermometer

## FUN FACT

Before there were thermometers there was an instrument called a thermoscope. Thermoscopes are devices that show changes in temperatures.

Unlike a modern thermometer, thermoscopes don't have standard scales for measuring temperature.

## THERMAL ENERGY

Thermal energy is the energy contained within a system that is responsible for its temperature.

Heat is the flow of thermal energy. The total kinetic energy of moving particles of matter is called thermal energy. All matter has thermal energy, even matter that feels cold. That's because the particles that make up matter are always in motion and have kinetic energy.

## MATERIALS

- Ice
- Water
- Small bowl
- Food coloring
- Modeling clay
- Bottle with small neck
- Clear plastic drinking straw

## DIFFICULTY

**Why are thermometers so smart?**
